Daniel Talks To Reporters After Son's Birth

Mr. and Mrs. Daniel Before The Happy Event

### HST's A Grandpop

## It's A Son For Clifton Daniels

NEW YORK (AP)—Mrs. Clifton Daniel, the former Margaret Truman, gave birth to a 9-pound, 8-ounce boy today. Motor and son were reported "doing fine."

"Margaret is very happy," said Daniel, "and I'm tired but happy." The baby is their first.

Former President Harry Truman and his wife Bess said they too were "very happy" about their first grandchild, Margaret is their only child.

The Trumans left their Independence, Mo., home by train at 7:32 a.m. today and are scheduled to arrive in New York tomorrow morning.

Asked if he wanted the baby named Harry, the former President laughed and said:

"I haven't got a thing to do with it."

## Committee OKs NAACP Bill

(More Legislative News on Page 8A)

RALEIGH (AP)—Legislation to require the NAACP and other organizations active in the field of racial relations to furnish the Secretary of State annually reports on their finances including lists of their dis-paying members was approved by a House committee today.

The House Corporations Committee debated several other proposals dealing with the issue before approving the measure. One plan, proposed by Rep. Frank Sneed of Mecklenburg, would have required a listing of dis-paying members.

**REQUIRE REPORTS**  
The bill would require the reports from corporations and other unincorporated associations—but not religious groups—whose principal activity is promoting an opposing segregation on public facilities.

A Senate Committee meanwhile, killed a bill which would control the retail price of beer, ale and other malt beverages. The bill introduced yesterday by Sen. Robert Cowan of Martin, would have the effect of keeping prices down to 20 cents per can.

The Senate Judiciary 2 Committee gave the bill an unfavorable report after State Alcohol Beverage Control Chairman Tom Allen told the committee it would be a "farce" and "impossible" to enforce.

### Evening Prayer

We pray, O Lord, for those who are in sorrow. Speak to them words of comfort which no human voice can utter. May their hearts be uplifted by the truth of Thy promises and may they find their sustenance from Thee, Through Christ our Redeemer. Amen.

### WEATHER

Considerable cloudiness with scattered showers and thunderstorms today, tonight and tomorrow.

Low this morning 69  
Low tomorrow morning 68  
High today 83  
High tomorrow 85  
High yesterday 90  
Sunrise today 5:08 a.m.; sunset today 7:35 p.m.

## Rutherford Struck By Flash Flood

RUTHERFORDTON (AP)—A flash flood, kicked up by several inches of rain in the past two days, struck a low area of downtown Rutherfordton today, driving a number of families from their homes.

Firemen held vacante residents of Cleghorn Street after a torrent of water swept down Laundry Hill about 3 a.m. and poured knee-deep into houses, flooded cellars and rose above the hoods of parked automobiles.

The waters receded later this morning.

### SPRING SHOWER

No injuries were reported and no damage estimates were available, but more rain was expected. The rains were part of a series of overnight spring showers which dumped inches of rain on western North Carolina. Streams were near bankfull stages and some damage was done to streets and roads already hard hit earlier this year by prolonged wet weather.

A slide blocked two lanes of U.S. 70 just east of Gulgaders Bridge this morning, and highway officials were keeping a weather eye on roads toward saturated cuts and fills.

### HEAVIEST RAINFALL

Heaviest rainfall was on headwaters of the French Broad River. Breward measured 3.74 inches for the 24-hour period ending at 7:30 a.m. today. Bowman had 3.50, Hendersonville 3.62, and Asheville an even 3 inches.

Other points reporting were Spruce Pine 3.43, Big East Fork 3.5, Sunburst 2.90, North Fork 2.40, Marshall 1.15, Canton 2.48 and Thumtree 1.86.

## 'ANNIE'S BITE TO OPEN NEW N.Y. AQUARIUM

NEW YORK (AP)—A male penguin misnamed Annie will help dedicate New York's new 13-million-dollar aquarium today when he bites a ribbon wrapped around a smelt.

Annie is a former tenant at the Battery on the lower tip of Manhattan. That one closed in 1941.

The new aquarium of concrete, glass and gray brick is on the boardwalk at Coney Island. Facilities for residents include a huge 100,000-gallon marine pool. An affable walrus called Olaf is the most spectacular denizen of the pool. Olaf is said to be the only walrus in captivity in North America.

There are hundreds of other exhibits, including tropical fish, electric eels, sharks, turtles—and Annie.

### LOSING BATTERY

COLUMBIA (AP)—The Central Baptist St. Peter's church league softball wasn't critical in league standings, but Central Baptist was relegated to get a 9-3 win last night.

The opposing battery was listed as Oullaw and Sin.

# The Would Ban Atomic Tests Under Total Disarmament

## Cites Disturbances Concerning Fallout

WASHINGTON (AP)—President Eisenhower said today he would favor a complete ban on testing of atomic weapons—if there could be total and complete disarmament.

Eisenhower said he would like to ally world-wide arms control over fallout radiation.

But Eisenhower went on to say at a news conference that the United States never could join in any ban on testing unless there also was an agreement with Russia against use of atomic weapons.

## President Sees End Of Major H-Bomb Tests

WASHINGTON (AP)—President Eisenhower said today he doubts the United States ever again will explode one of the great hydrogen bombs for testing purposes.

At the same time, he said the United States will join in an international agreement to end atomic tests only if that is part of a safeguarded disarmament program to prevent the use of nuclear weapons in any future war.

For his part, Eisenhower did not explain precisely what he meant in saying there probably would be no more tests of the great hydrogen bomb. He did not make clear where he would draw the line in bomb sizes.

He made the statement after answering a series of questions concerning U.S. policy on ending atomic test explosions.

Eisenhower talked about how the United States had been testing various atomic devices and reducing the amount of fallout, moving toward what the scientists call "clean" weapons and developing defenses against radiation damage.

Asked whether his words stressing reduction of fallout meant that the United States is not going to test any more H-bombs, Eisenhower replied he thought the government had found that the H-bomb proportionate to its size is the cleanest of atomic weapons.

Atomic Energy Commissioner Willard F. Libby told Congress today that nuclear bomb testing is "a small risk" that must be measured against "the risk of annihilation" if he surrendered the weapons.

Libby's testimony was prepared for a Senate House Atomic Energy subcommittee investigating effects of radiation and fallout. Other scientists have testified that excessive man-made radiation from bomb tests and other sources can cause cancers and damage to future generations.

He mentioned the 40,000 annual highway deaths, risk of drowning at beaches and "accidents in the home."

"Here our choice seems much clearer," he said. "Are we willing to live with this very small, but rigidly controlled risk, or would we prefer to run the risk of annihilation which might result if we surrendered the weapons which are so essential to our freedom and actual survival?"

Asked what he meant by "small risk," Libby said that there is no risk, "said Libby, an atomic physicist, but he contended there are risks in many human activities."

## Balloon Is Site For Bomb Blast

ATOMIC TEST SITE, Nev. (AP)—The United States today exploded a baby nuclear device for the first time from a balloon 500 feet above Yucca Flat.

The explosion, touched off at 4:55 a.m. PDT, was barely discernible at Las Vegas, about 70 miles away.

The Atomic Energy Commission said officials at the control point about 15 miles from the balloon saw a brief flash and several seconds later the usual mushroom appeared. It rose slowly to about 6,000 feet.

Dr. Gerald W. Johnson test director from the U.S. summer series, appeared smaller than the one fired last Sunday, which was estimated at about 2 kilotons. A kiloton is the equivalent of 1,000 tons of TNT.

Observers said the shuf third in the series, summer series, appeared smaller than the one fired last Sunday, which was estimated at about 2 kilotons. A kiloton is the equivalent of 1,000 tons of TNT.

Mrs. Virgie Wyss Is Surrounded By Her Four Children

## Mother Finds Her Children After Search Of 18 Months

ARK., where the family then she went to church, she found her four children here yesterday after an 18-month search night of Dec. 15, 1955, at Piggett, Ark. She told District Judge O. Q. Clavin III she last saw them there.

Her search led to Michigan, Illinois, Tennessee, Louisiana and California. Mrs. Wyss finally went to live with her parents in Lewisville.

## Teacher Pay Hike May Bring Delay

RALEIGH (AP)—The possibility of a drawn-out fight on the issue of a pay raise for school teachers loomed today as the Senate Appropriations Committee prepared to report the charter floor.

The Senate Appropriations Committee rejected the 15 per cent pay raise for teachers as recommended by its subcommittee and Gov. Hodges.

The House Appropriations Committee rejected the 15 per cent pay raise and voted to boost salaries of classroom teachers to 16.69 per cent. The House Committee adjourned after its vote and planned to meet again today.

While the difference between the committees would delay final adjournment this week, Sen. Easley said "There is a distinct possibility that we can still get away with Saturday."

Both House and Senate Appropriations committees would delay final adjournment this week, Sen. Easley said "There is a distinct possibility that we can still get away with Saturday."
