Give-Up-For-Lost Miners Brought Out

... Fate Of 55, Buried A Week, Unknown

Springhill, N.S. (Thursday) —Rescue workers — spurred by a whispered plea to "come and get us"—clawed a path through a rock barrier early Thursday to reach 12 men trapped for 6 days in the dark depths of North America's deepest coal mine.

They raised the known death toll to 26. The miners were trapped by a tremendous underground upheaval that miners call a bump. Of the 174 in the mine, 81 reached safety.

Men working at low levels, 13,400 feet and 13,800 feet, were given up as lost a few days after the disaster.

Two of the 12 were reported injured. One had a broken leg but the extent of the other's injuries was not immediately reported.

The dramatic finding of the hungry, thirsty miners bred hope that some of the 55 men still missing may have lived through the massive underground upheaval that shook the Cumberland No. 2 diggings last Thursday night.

Of the 174 men underground then, 26 bodies have been recovered and 81 previously were brought out alive.

"There might be other miners alive," a company official said. But he refused to confirm rumors sweeping the anxious crowd that other men were known to be alive.

The 12 were found at the 13,000-foot level of the Cumberland mine, a subsidiary of the Dominion Steel and Coal Co., less than a dozen hours after the first contact.

The contact came when a miner's pick, crashing into the rubble of a rock fall, punctured a 6-inch compressed air line Wednesday afternoon.

Through the line came a croaking voice: "There are 12 of us here. Come and get us."

"Get us water, you guys. There are 12 of us in here alive."

"We're in good shape, but we need water badly."

The speaker was miner Gene Kempf, 37, married and the father of two children. Among his companions were Joseph McDonald, 38, and Hugh Guthrie, 31, who survived a 1956 explosion in an adjoining mine that killed 30 men.

Their lamps had burned out long ago, leaving the 12 in utter darkness behind a deep wall of rubble that blocked the passageway to their pocket.

Among the rescuers who made the 1st contact was Percy Weatherbee, a nephew of Kempf.

The rescuers dug frantically, but it took from 2 p.m. to 10 p.m. to cut a 3-foot path through the 1st 20 feet of the barrier. It had been estimated that the rock wall was 60 feet thick, but the breakthrough

Lawmen Blamed Caril To Cover Mistakes, Defense Attorney Says

... Prosecution Says She Was Willing Helper; 7 Men, 5 Women On Jury

By Del Harding
Caril Fugate's defense attorney charged Wednesday afternoon that Lincoln lawmen found it necessary to condemn Caril was Charles Starkweather's murder accomplice to cover up their own mistakes.

Atty. John McArthur, in his opening statement at Caril's murder trial in Lancaster District Court, said the 15-year-old girl "did everything in her power" to prevent the murder of Robert Jensen of Belmont. She is charged as Starkweather's accomplice in his death.

Must we condemn Caril, he asked, for failing to do what no one in Nebraska could do, stop mad killer Starkweather?

"Mistakes Repeated"
McArthur declared that local lawmen "made mistakes" in attempting to solve the Robert Jensen murder (later admitted by Starkweather) which "were repeated" in the

Jury Alternates

Mrs. Schmidt, Loudon Housewife NU Employee

later killings attributed to Starkweather. He did not elaborate on what these "mistakes" were, but did say that police "grossly misinterpreted" Caril's attempts to warn them about Starkweather when they came to her home at 924 Belmont.

McArthur also said "police took the position it was none of their business" when told by Caril's friends and relatives of her "strange behavior" when they attempted to gain entrance to her home.

He said from the time Caril came home from school Jan. 21 and allegedly found Starkweather behind the door with a gun in his hand her actions were conditioned by "the vivid memory of a gun pointing in her face."

"As Any Child Would"
Caril "obeyed Starkweather's instructions implicitly—just as any other 14-year-old child would do," he added. (Caril was 14 when the crime rampage took place but has since turned 15.)

Lancaster County Atty. Elmer Scheele, however, in his opening statement had a different version of Caril's participation in the murder spree which claimed 10 lives.

Caril "willingly and actively participated in the places he went and the things he did," Scheele declared.

She had "ample opportunity" on "more than one occasion" to get away from Starkweather, he added.

Scheele said, as he did in the Starkweather trial last May, that Caril aided in the robbing and killing of the 17-year-old Jensen. He said Jensen handed Caril his billfold, as ordered, and Caril took the money from it and placed it in Starkweather's billfold.

"Both Held Guns"
When Jensen had driven to the abandoned school site east of Belmont as directed by Starkweather, Jensen and his girl friend, Carol King, were ordered from the car "at gun point" by both Starkweather and Carl Fugate," Scheele said.

Caril, he said, had a loaded 410 sawed-off shotgun in her possession and Starkweather had a loaded .22 rifle at the time.

These 12 Will Decide Caril's Fate

Mrs. Schmidt, Loudon Housewife NU Employee

Schmidt of 1220 No. 42nd, a housewife, were finally chosen late Wednesday afternoon as alternate jurors. They would serve if any regular juror should become incapacitated.

A total of 67 persons were questioned before the 12 jurors and 12 alternates were chosen. This compares with questioning 95 persons before a jury was selected at the Starkweather trial.

Eleven persons were excused because they opposed ever giving the death penalty, 9 because they had firm opinions as to Caril's guilt, 6 because they knew persons involved in the case and one for medical reasons.

Seven men and 5 women were selected to complete the 12-member jury which will decide Caril's guilt or innocence. They were:

T. C. Eichelberger, 6640 Colby, meat buyer for wholesale grocery firm. Mrs. Letha B. Cobb, 4726 Pawnee, housewife. Mrs. Lois H. Hunt, 326 B, housewife.

H. F. Theimer, 4339 Randolph, salesman for a leather company. Elmer Essin, Firth, salesman for Lincoln appliance store.

Thero R. Urbane, 3118 T, employe of City Street Dept. Mrs. Verla M. Bouchard, 2527 C, housewife.

John C. Paal, Rt. 5, welder at local steel firm. C. E. Asthelm, Rt. 8, dairy farmer.

Mrs. Dorothy D. Eddy, 2500 No. 64th, instructor with University of Nebraska extension division. H. A. Walenta, 623 So. 32nd, employe of Crete motor parts firm.

Mrs. G. M. Petersen, 1917 Prospect, teacher at South-east Junior high school.

Ballot Change Impossible: J. R. Kelly, Demo Candidate For State Auditor, Dies At 70

Omaha (P-J) R. Kelly, 70, of Omaha, Democratic nominee for state auditor, died suddenly Wednesday night. He was stricken at his home and died soon after his arrival at a hospital. Kelly was a former auditor and had served in the state auditor's office. He retired in 1951 after 6 years as an Mr. Kelly auditor for the city of Omaha. A spokesman for the attorney general's office said it is

A-Test Issue Up To Soviets

U.S. To Follow Reds— If Russians Ignore Ike Plan, AEC To Continue Atomic Plans, Says McCone

Washington (P)—If Russia sets off more nuclear weapons explosions after suspension talks start Friday, the United States will be ready in short order for more tests of its own. The chairman of the Atomic Energy Commission, John A. McCone, gave this summary of the U.S. position Wednesday at his first news conference since taking over in July: AEC doesn't believe in conducting tests just for the sake of conducting tests and it would not undertake to match the Russians shot for shot. But if Russia ignores President Eisenhower's proposal for a year's suspension while negotiations are tried, it wouldn't be long before the commission would be ready to go ahead with tests to improve U.S. atomic capabilities.

"Stopping tests now would probably delay or prevent development of small, clean weapons," McCone said. Development of such weapons, with fewer hazards of radiation and suitable for limited operations and defense against intercontinental missiles, is a prime military objective of the AEC.

The United States, Great Britain and the U.S.S.R. start talking in Geneva Friday about agreement on a system for policing a ban on weapons tests. The United States and Britain have said they are willing to suspend testing immediately, if the Russians do likewise, while the negotiators have their chance.

McCone took little stock in stories that espionage enabled the Russians to come up with what he conceded was reasonably precise information about the scale of recent U.S. tests in the Pacific. "It is very difficult to make a categorical statement that there is no espionage in any department," he said. "But I can think of a great many ways in which the information released by the Russians might have been obtained, without a spy in the offices of the AEC."

As for the Russian tests, McCone said there was no evidence that the Russians—as had been suggested in some radiation reports from Japan—were deliberately making "dirtier" bombs.

Heavy radiation recorded in Japan, he said, apparently meant that the current quick Russian series of tests was the greatest concentration so far of nuclear shots in a limited time.

Next is a 1,500-foot balloon shot of less than 20,000 tons TNT power.

The weather: Neb. Fair through Friday. Warmer over most of state by Friday. Highs 50s west to lower 60s southeast Thursday.
