Judge Redd's Action Conflicts With His Implied Promises

With this Implied Promises
The lawyers uphold Judge F. M. Reddis
authority to fire Mrs. Sarah Ros. House,
Juvenile Court secretary, henre three is
no question of legality. As to the reasons for her dicherage so zoon after the
public complaint raised against Judge
Redd for the manner in which his court
functioned—in the face of her five years
of apparently satisfactory service—they
appear to be capricious. Yet sometimes,
we know, it is hard for an employer to
put in words reasons that may be good
enough for letting somenon go.
What concerns us more at the moment
than the secretary's job is the larger

What concerns us more at the moment than the secretary's job is the larger question of Juvenile Court procedure and practices. There was implied in Judge Redd's statement at the time of the joint poulic seasion of the Gity Council and County Commissioners a willingness to be guided not only by the letter but by the splitt of the recommendations drawn up, sfort horough investigation, by the Children's Division of the Council of Social Accesses with exercise with the council of Social Accesses with exercise with exercise with the council of Social Accesses with exercise w of Social Agencies and endorsed by other of docisi agencies and endorsed by other interested organizations. A paragraph from Judge Redd's address at that time is pertinent to his change in secretaries;

is pertinent to his change in accretaries. "The recommendations rate that improvements can be had without any additional expense. It is obvious that new trained workers cannot be added without additional expense. This presents without additional expense. This presents without exclusions expense. It is on this is a matter which should not be discussed publicly, but should be handled privately. I am sure thouth about not be girl to recommend myself without the property. I am sure that the Council control is the state of the property. I am sure that the Council control is the state of the council and the commissioners to agree upon and the Council source to agree upon and the Council source to agree upon the support me in whatever actions are presented to the property of the present of the property of the present of the property of the present of the p

that fact and its support me in whatever action may be necrosary.

This had reference to case workers, we take it, rather than office employees, yet seemed to express Judge Redd's own entire satisfaction with the personnel of Juvenile Court. It seemed to convey in didition a facility pomise to seek the addition a facility pomise to seek the addition a facility pomise to seek the addition a facility pomissioners before he took any such summary action as he may such a summary action as he has taken in discharging the courte long-time secretary. In the light of that statement, delivered under stress, the dismissal of Mrs. Houser a few weeks later takes on a somewhat arbitrary appearance, and while we are not prepared to come, and that the dismissal should be stayed, we do urge that the Council and Commissioners lose no time in appointing and solving board of interested persons with which the Judge of Juvenile Court may confer and consult.

Or in another article it is the Army which red there first and the Navy complains.
